

Safer Medication Routines. Less Stress for IDD Care Teams.

SafeDose, a pharmacy by AnewHealth, helps IDD communities improve health, reduce medication errors, and give staff back time to focus on the individuals they serve.

What We Do for Our IDD Partners

SafeDose provides a pharmacy care solution built for the IDD community. We handle the complexity of prescriptions, packaging, refills, and coordination so your teams can focus on providing exceptional care.

- ✔ **Simpler medication routines**
- ✔ **Improved safety and adherence**
- ✔ **Reduced staff burden**
- ✔ **Better documentation and oversight**

How SafeDose Makes a Difference

For Individuals

- More consistent medication routines
- Fewer missed doses and errors
- Support for better long-term health outcomes

For DSPs & Staff

- Less time tracking down refills
- Fewer last-minute emergencies and pharmacy callbacks
- More time for direct support and meaningful interactions

For Your Organization

- Increased safety and quality of care
- Reduced risk related to medication errors and documentation gaps
- A partner aligned with your mission and regulatory requirements

SafeDose Makes Med Management Safer & Easier

Review and Plan

We begin with your existing records and send a “fill list” to confirm medication accuracy.

Resolve Concerns

Pre-bill and verify insurance to prevent delays and avoid formulary and prescriber challenges.

Packaging and Safety

Medications packaged by day and time, photographed and checked by pharmacists.

Delivery and Support

Free delivery and a dedicated team to manage refills, prescribers and concerns.

Designed for IDD Care Teams.

For decades, SafeDose has focused on IDD communities, behavioral health, and residential care. We understand the complexity of staff schedules, varied living arrangements, and regulatory requirements.

- **Multiple packaging options:** compliance packets, punch cards, bottles
- **eMAR-friendly barcodes and documentation** to support accurate administration and audits.
- **Reporting options** for medication records, controlled substance tracking and physician order sheets.
- **24/7 digital access** to client information, including printable up-to-date MARs (with eMAR option).
- **Support to facilitate transfer of prescriptions** from an individual's current pharmacy.

“Before SafeDose, we had too many packaging errors and timely delivery problems. SafeDose corrected this and lowered our medication error rate by 80%...Through SafeDose service, our error rates have declined and compliance increased.”

– Regional Director for multi-facility IDD community
